ELSEVIER

Volume 57, February (1996) 399–401

Journal of Materials Processing Technology

Contents for Volume 57

A note on rapid surface melting by laser 1
E. Ramous (Padua, Italy)

Influence of the tool clearance in the cylindrical cup-drawing process 4
Y.-M. Huang, J.-W. Chen (Taipei, Taiwan, ROC)

Upper-bound and finite-element analysis of axisymmetric hot extrusion 14
N. Venkata Reddy, R. Sethuraman, G.K. Lal (Kanpur, India)

Ballistic performance of high-strength low-alloy steel weldments 23
G. Madhusudhan Reddy, T. Mohandas (Hyderabad, India)

Inter-critical deformation of a Cr–Ni–Mo steel 31
R. Colás (San Nicolás de los Garza, Mexico), J.H. Beynon (Leicester, UK)

Computer-aided optimal turning of stepped shaft 38
N.K. Jha (Riverdale, NY, USA)

A process model for air bending 48
L.J. de Vin (Jordanstown, Northern Ireland and Enschede, Netherlands), A. H. Streppel (Enschede, Netherlands), U.P. Singh (Jordanstown, Northern Ireland), H.J.J. Kals (Enschede, Netherlands)

Detection of tool failure in end milling 55
Y.S. Tarng, M.C. Chen (Taipei, Taiwan, ROC), H. S. Liu (Yunlin, Taiwan, ROC)

The calculation of cooling time in injection moulding 62
J.Z. Liang (Guangzhou, People's Republic of China), J.N. Ness (Hong Kong, Hong Kong)

Flat-end cutter path generation for a sculptured surface for 3-axes NC machining 65
Daoyuan Yu, Zhengcheng Duan, Wei Zhang, Jinning Liu (Wuhan, People's Republic of China)

Comparison of a numerical analysis of rolling with experimental data 70
A.B. Richelsen (Lyngby, Denmark)

A technique of tool-shape optimization in large scale problems of metal forming 79
J. Kusiak (Kraków, Poland)

Prediction of thermal stresses during vertical solidification of a pure metal with density change 85
J. Lee, K.-Y. Hwang (Seoul, South Korea)

A study on parameter optimization in the circumferential GTA welding of aluminium pipes using a semi-analytical finite-element method 95
S.-J. Na, H.-J. Lee (Taejon, South Korea)

Finite-element simulation of axisymmetric preforms in precision forging at elevated temperatures 103
A.G. Mamalis, D.E. Manolakos, A.K. Baldoukas (Athens, Greece)

Net shape manufacturing of silver-sheathed high-T_c superconductive ceramic (Y–Ba–K–Cu–O) strip by explosive compaction/cladding and rolling 112
A.G. Mamalis (Athens, Greece), A. Szalay (Budapest, Hungary), D. Pantelis, G. Pantazopoulos (Athens, Greece)

Experimental investigations on the forming of regularly spaced deep recesses on aluminium sheet metal panels 121
S. Thiruvarudchelvan, F.W. Travis (Singapore, Singapore)

A study of void crushing in large forgings.
I: Bonding mechanism and estimation model for bonding efficiency 129
C.Y. Park, D.Y. Yang (Taejon, South Korea)

On the optimisation of two-component plates against ballistic impact 141
B. Wang, G. Lu (Singapore, Singapore)

Elsevier Science S.A.

Speed effects in drawbead simulation 146
J.A. Schey (Waterloo, Ont., Canada)

Fabrication of multi-layered steel/superconductive ceramic (Y–Ba–K–Cu–O)/silver rods by explosive powder compaction and extrusion 155
A.G. Mamalis (Athens, Greece), A. Szalay (Budapest, Hungary), D.I. Pantelis, G. Pantazopoulos (Athens, Greece), I. Kotsis, M. Enisz (Veszprem, Hungary)

Simulation of the precision forging of bevel gears using implicit and explicit FE techniques 164
A.G. Mamalis, D.E. Manolakos, A.K. Baldoukas (Athens, Greece)

The effect of metal type and multi-layering on friction surfacing 172
A.W. Batchelor, S. Jana, C.P. Koh, C.S. Tan (Singapore, Singapore)

Computer-monitored hydraulic bulging of tubes 182
S. Thiruvarudchelvan, G.L. Seet, H.E. Ang (Singapore, Singapore)

Computer-integrated ball burnishing of a plastic-injection-mould cavity insert 189
S.S.G. Lee, N.H. Loh (Singapore, Singapore)

Local discretization without tolerance in the CAD/CAM and NC programming of a sculptured surface 195
Daoyuan Yu, Zhengcheng Duan, Xiong Zhuang, Jinning Liu (Wuhan, People's Republic of China)

Courseware

Visualization of the casting process through computer animation 201
F.L. Tan, S.C. Fok (Singapore, Singapore)
The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.

Review

Surface/subsurface damage and the fracture strength of ground ceramics 207
K. Ti, T.W. Liao (Baton Rouge, LA, USA)

Articles

Phase investigation of an iron meteorite from Akyumak 221
İ. Aksoy (Malatya, Turkey), M. Ceylan, N. Kayali (Elaziğ, Turkey)

Design considerations of over-crank and under-crank guillotine shears: a comparative study 225
V. Ramamurti (Madras, India), S. Gowri (Rolla, MO, USA)

The deformation behavior and microstructure evolution of high-strength alloy steel at high rate of strain 233
Woei-Shyan Lee, Han-Fai Lam (Tainan, Taiwan, ROC)

A computer-aided engineering system for feature-based design of box-type sheet metal parts 241
R. Mantripragada, G. Kinzel, T. Altan (Columbus, OH, USA)

Study on welding such dissimilar materials as AISI 304 stainless steel and DHP copper in a sea-water environment. Influence of weld metals on corrosion 249
E. Zumelzu, C. Cabezas (Valdivia, Chile)

Evaluation of machine selection by the AHP method 253
Z.-C. Lin, C.-B. Yang (Taipei, Taiwan, ROC)

A reclassification of the die-filling stages in pressure die-casting processes 259
Y.B. Lui, W.B. Lee (Hong Kong, Hong Kong), B. Ralph (Uxbridge, UK)

Plastic instability in equi-biaxial deformation of aluminium alloy sheet 266
R. Mahmudi (Tehran, Iran)

Ultra-precision grinding of structural ceramics by electrolytic in-process dressing (ELID) grinding 272
H. Ohmori, I. Takahashi (Tokyo, Japan), B.P. Bandyopadhyay (Grand Forks, ND, USA)

Evaluation of the preform design of a stepped forging part by coupled thermoviscoplastic finite-element analysis and visioplasticity 278
R.-S. Lee, T.-C. Chen, M.-C. Pan (Tainan, Taiwan, ROC)

Surface hardening and deposition of coatings on metals by a mobile source of localized electrical resistive heating. . . . 288
G.W. Stachowiak (Nedlands, Australia), A.W. Batchelor (Singapore, Singapore)

Numerical computation of cavity damage and failure during the superplastic deformation of sheet metals. 298
D. Zhixiao, L. Miaoquan, L. Mabao, W. Shichun (Shaanxi, People's Republic of China)

Investigation of the surface integrity of laser-cut ceramic 304
J.H. Zhang (Jinan, People's Republic of China), T.C. Lee (Hong Kong, Hong Kong), X. Ai (Jinan, People's Republic of China), W. S. Lau (Hong Kong, Hong Kong)

Estimation of the magnetic pressure in tube expansion by electromagnetic forming 311
S.H. Lee (Taejon, South Korea), D.N. Lee (Seoul, South Korea)

Laser fantasy: from machining to welding 316
T.M. Yue, C.Y. Jiang, J.H. Xu (Kowloon, Hong Kong), W.S. Lau (Chai Wan, Hong Kong)

Plane-strain compression molding analysis of sheet molding compounds in flat and cross-sectional T-shape molds 320
J.-H. Jeong (Taejon, South Korea), K.-T. Kim (Suwon, South Korea), Y.-T. Im (Taejon, South Korea)

Prediction of the mechanical properties of hot-rolled C–Mn steels using artificial neural networks 332
Z.Y. Liu, W.-D. Wang, W. Gao (Auckland, New Zealand)

An analysis of thermal stress and distortion in bead-on-plate welding using laminated isotropic plate theory 337
K.-Y. Bae (Ulsan, South Korea), S.-J. Na (Taejon, South Korea)

Measurement of friction and material flow-stress by a plane-strain compression tribometera 345
S.L. Wang (Kowloon, Hong Kong), J.A.H. Ramaekers (Eindhoven, Netherlands)

Design and implementation for maximum metal removal-rate control of a constant turning-force system 351
K.-H. Fuh, C.-T. Chen, Y.-F. Chang (Taipei, Taiwan, ROC)

Analysis of superplastic blow-forming in a circular closed-die. 360
Y.M. Hwang, J.M. Liew, T.R. Chen, J.C. Huang (Kaohsing, Taiwan, ROC)

Computer analysis and fuzzy control for fabricating a plastic HOE with an injection method 373
C.S. Lin (Taichung, Taiwan), Y.L. Lay (Chung-Li, Taiwan), H.J. Shieh (Taipei, Taiwan), R.S. Chang (Chung-Li, Taiwan)

A finite-element prediction of densification kinetics during the hot isostatic pressing of metal powder compacts 382
A.G.K. Jinka (Columbus, OH, USA)

Short Communication

Stereolithography and the biomedical engineering. 393
J.-J. Clair (Belfort, France)
